

Introduction to Integration

SALESFORCE INTEGRATION

A COMPLETE COURSE

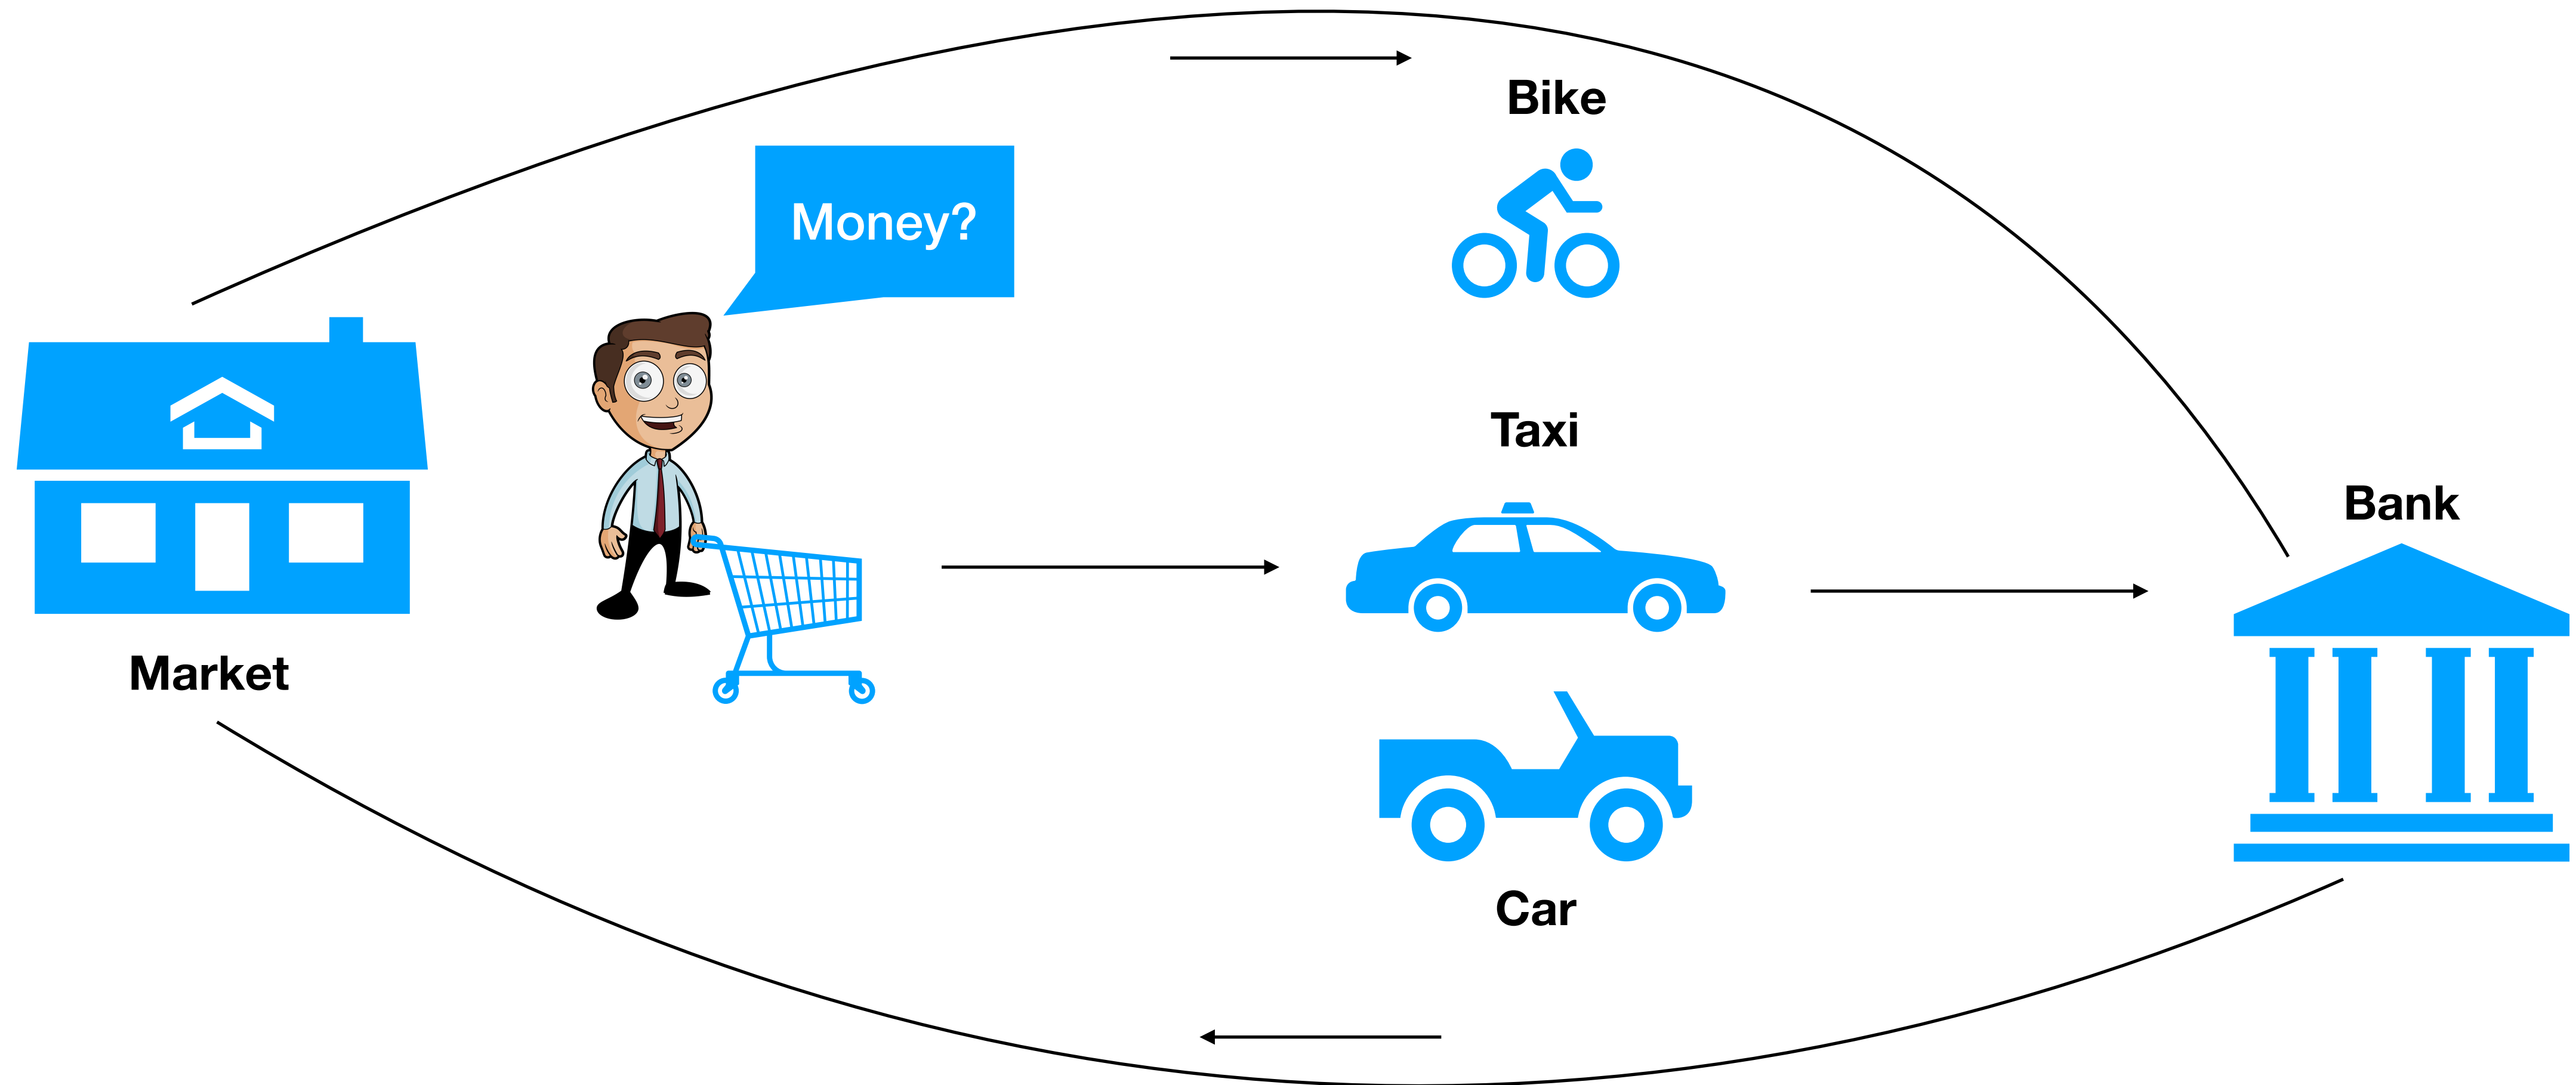

Next 5 Minutes

1. What is Integration?
2. What is the need of Integration?

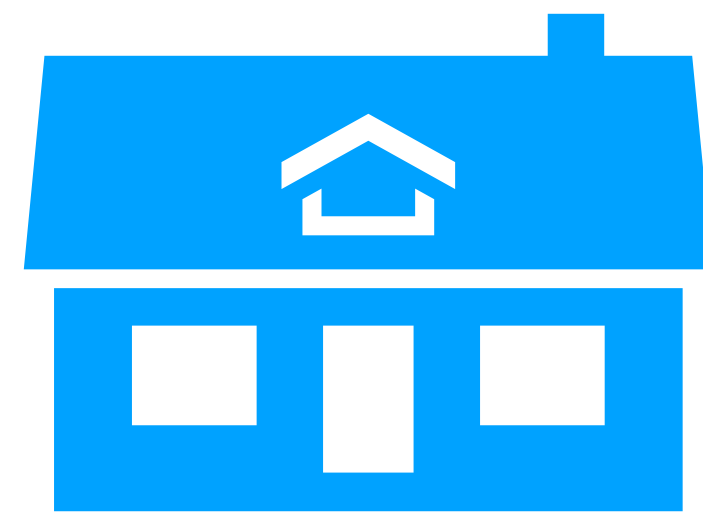

What is Integration

1. Integration is nothing but an act of bringing smaller component together in order to work as single component.
2. If we talk about in IT context, Integration refers to end result which works together to serve / function as a single entity.

Before Integration

After Integration
